

Make a Stegosaurus mask

Ask an adult to help you cut along the dotted lines around the Stegosaurus mask. Once you have done this, use a pencil to push through a little hole where the dotted circles are on either side of the Stegosaurus's face.

Next, tie your string or elastic through the holes, making sure that it stretches enough to go round your head. Don't forget to cut out little holes for your eyes, or you might bump into something!

Now that your mask is finished, who are you going to say Raaah! to first?
